Dear Sir:

In response to the Office Action dated December 19, 2001 (Paper No. 28),
please amend the above-identified U.S. Patent application as follows:

In the Claims

- 942/E1
1. (Amended) A process for the production of a cereal wort or beer having a high content of soluble β -glucan of more than 0.2 wt % from a cereal or mixture of cereals in which the β -glucanase activity of any ingredient employed in the process will not decrease soluble β -glucan by more than 20 wt% compared to the yield from the corresponding source of non-germinated cereal or mixture of cereals, the process comprising the steps of:
- E1
- treating at least one cereal by heating to reduce β -glucanase activity in the treated cereal;
 - forming an aqueous cereal slurry containing from 10% to 30% by weight of the treated cereal, the cereal being wet or dry milled; and
